

❖ This project is due **March 29, Monday.**

Design a small business web site for a new local French restaurant. It is named la Mer which means ocean. The pictures provided are just raw resources. In order to make your composition more intriguing, you can feel free to crop, resize them. You may also add your own pictures (such as the interior view of the restaurant, etc.). When you pick the color scheme for the entire web site, consider how to make it work with the logo colors.

Requirements:

- ⊕ The web site should contain at least 5 pages, including one homepage and 4 sub-pages.
- ⊕ In the navigation bar, it should include several items. Here is an example:
Home/ Menus/ Specials/ Wines/Recipes/ Reservations/ Contact/
- ⊕ The logo of the restaurant should appear somewhere in each page;
- ⊕ On each page, you must use CSS layout;
- ⊕ The Spry Tabbed Panels must be used;
- ⊕ This site must include external link, internal link, email link.
- ⊕ The graphics prepared from Photoshop should be optimized (file format: gif, jpeg, png);
- ⊕ The swap image technique should be used;
- ⊕ The behavior skills (such as open browser window, etc.) should be used;
- ⊕ When each page is opened in browser, it should have a title;
- ⊕ When you hand in the final site folder, the site structure should be clean and organized. It should contain an "images" folder, an "index.htm" file and a few other html files.
- ⊕ You should name this site folder "your last name_277P1".

Schedule:

03/01	M	Intro to Project 1, Demo_Spry tabbed panel
03/03	W	Project1 sketches review, work day
03/08	M	work day
03/10	W	In-process individual critique, work day
03/22	M	work day
03/24	W	work day
03/29	M	Critique day. Project is due.
